STEVE KIRSCHBAUM
International Research Services

GLOBAL DATA PROCESSING

EDUCATION & WORK EXPERIENCES

Steve Kirschbaum has been in the industry for 14+ years and having 17+ years of overall experience in technology field. Steve's specialties include web / mobile development, relational and non-relational database design, Business Intelligence, reporting, server architecture, release deployment, and best engineering practices.

As GDP at IRS, Steve leads the engineering team and is passionate about improving processes, reducing cost, eliminating barriers and continuous delivery. He played a key role in development of IRS products from scratch with database design, coding architecture, server architecture on AWS, setup of engineering processes, and end to end deliverables. Prior to IRS, Steve worked with IPSOS. Steve and his team launched the IRS Suite; a fully integrated collection of next generation products that execute autonomous high-quality research and expedites the insights journey. As th Officer for Global Data Processing, he is responsible for the overall strategic and tactical deliveries of our global operations.

He also has experience operating external IT businesses. Steve graduated from Boston College, where he received a Bachelor of Science in IT Development and Strategic Analytics.
